Accounting or accountancy is the measurement, processing, and communication of financial information about economic entities such as businesses and corporations. The modern field was established by the Italian mathematician Luca Pacioli in 1494. Accounting, which has been called the "language of business", measures the results of an organization's economic activities and conveys this ...

In accounting, the convention of conservatism, also known as the doctrine of prudence, is a policy of anticipating possible future losses but not future gains. This policy tends to understate rather than overstate net assets and net income, and therefore lead companies to . When given a choice between several outcomes where the probabilities of occurrence are equally likely, you should ...

3 proportional to his working hours and, if  $i$  is typical of workers, a firm's effective labor input is the sum of hours worked over all workers. This would rationalize the use of worker-hours. More plausibly,  $i$ 's work effort depends on his hours of work:  $E_i = f(H_i)$  where  $f(H_i)$  embodies the stress, fatigue, monotony, and stimulation that accompanies work.
