acid and base ph pdf

Acid–base homeostasis is the homeostatic regulation of the pH of the body's extracellular fluid (ECF). The proper balance between the acids and bases (i.e. the pH) in the ECF is crucial for the normal physiology of the body, and cellular metabolism. The pH of the intracellular fluid and the extracellular fluid need to be maintained at a constant level.. Many extracellular proteins such as ...

Acid–base homeostasis - Wikipedia

An acid–base reaction is a chemical reaction that occurs between an acid and a base, which can be used to determine pH.Several theoretical frameworks provide alternative conceptions of the reaction mechanisms and their application in solving related problems; these are called the acid–base theories, for example, Brønsted–Lowry acid–base theory.

Abstract Although short (up to 3 days) exposure to major shifts in macronutrient intake appears to alter acid–base status, the effects of sustained (>1 week) interventions in elite athletes has not been determined.

DNA (DNA = deoxyribonucleic acid) • DNA is the genetic material of all living cells and of many viruses. • DNA is: an alpha double helix of two polynucleotide strands. • The genetic code is the sequence of bases on one of the strands. • A gene is a specific sequence of bases which has the information for a particular protein. • DNA is self-replicating - it can make an identical copy ...
