

adults with down syndrome pdf

Down syndrome (DS or DNS), also known as trisomy 21, is a genetic disorder caused by the presence of all or part of a third copy of chromosome 21. It is typically associated with physical growth delays, mild to moderate intellectual disability, and characteristic facial features. The average IQ of a young adult with Down syndrome is 50, equivalent to the mental ability of an 8 or 9-year-old ...

Down syndrome - Wikipedia

INTRODUCTION. Children with Down syndrome have multiple malformations, medical conditions, and cognitive impairment because of the presence of extra genetic material from chromosome 21. 1,2 Although the phenotype is variable, there typically are multiple features that enable the experienced clinician to suspect the diagnosis. Among the more common physical findings are hypotonia, small ...

Abstract Reciprocal communication between couples is central to sustaining strong intimate relationships. Given that Asperger's Syndrome (AS) affects communication and social reciprocity, adults with this disorder are vulnerable to experiencing difficulties in relating to their "neurotypical" (NT) partner. As reported in a previous paper, prompt dependency was found to be a compensatory ...

The first trimester screening is a combination of tests for PAPP-A, hCG and nuchal translucency that are used to assess the risk that the fetus a pregnant woman is carrying has a chromosome disorder such as Down syndrome (trisomy 21) or Edwards syndrome (trisomy 18).

First Trimester Screening - Lab Tests Online

Prenatal testing for Down syndrome provides a recalculation of the possibility that a pregnancy is positive for Down syndrome. But, odds are that almost every pregnant woman will not give birth to a child with Down syndrome and this holds true for even most pregnancies positive for Down syndrome. Down syndrome pregnancies naturally miscarry most of the time.
