Global status report on alcohol and health

Alcoholism, also known as alcohol use disorder (AUD), is a broad term for any drinking of alcohol that results in mental or physical health problems. The disorder was previously divided into two types: alcohol abuse and alcohol dependence. In a medical context, alcoholism is said to exist when two or more of the following conditions are present: a person drinks large amounts over a long time ...

Slightly more than half of Americans aged 12 or older report being current drinkers of alcohol. SAMHSA's National Survey on Drug Use and Health (NSDUH) " 2014 (PDF | 3.4 MB) reports that in 2014 there were 139.7 million current alcohol users aged 12 or older, with 23% classified as binge drinkers and 6.2% as heavy drinkers. About 17 million of these, or 6.4%, met criteria for an alcohol ...

Alcohol | SAMHSA - Substance Abuse and Mental Health

The modern disease theory of alcoholism states that problem drinking is sometimes caused by a disease of the brain, characterized by altered brain structure and function.. The American Medical Association (AMA) declared that alcoholism was an illness in 1956. In 1991, the AMA further endorsed the dual classification of alcoholism by the International Classification of Diseases under both ...

Disease theory of alcoholism - Wikipedia

Throughout the 10,000 or so years that humans have been drinking fermented beverages, they've also been arguing about their merits and demerits. The debate still simmers today, with a lively back-and-forth over whether alcohol is good for you or bad for you. It's safe to say that alcohol is both ...
