Se denomina ALGOL (o Algol) a un lenguaje de programación. La voz es un acrónimo de las palabras inglesas Algorithmic Language (lenguaje algorítmico).. Fue muy popular en las universidades durante los años 60, pero no llegó a cuajar como lenguaje de utilización comercial.. Sin embargo, Algol influyó profundamente en varios lenguajes posteriores que alcanzaron gran difusión, como ...

This type of for-loop is a generalisation of the numeric range type of for-loop, as it allows for the enumeration of sets of items other than number sequences.

Task. Provide a function to find the closest two points among a set of given points in two dimensions, i.e. to solve the Closest pair of points problem in the planar case. The straightforward solution is a  $O(n^2)$  algorithm (which we can call brute-force algorithm); the pseudo-code (using indexes) could be simply: ...

I think that Multics was the first to provide a hierarchical file system. The influence of that innovation can be found in virtually every modern operating system, including Unix, Mac OS, DOS and Windows.

The Fibonacci sequence is a sequence  $F_n$  of natural numbers defined recursively:  $F_0 = 0$   $F_1 = 1$   $F_n = F_{n-1} + F_{n-2}$ , if  $n > 1$ . Task. Write a function to generate the  $n$ th Fibonacci number. Solutions can be iterative or recursive (though recursive solutions are generally considered too slow and are mostly used as an exercise in recursion).

Abstract. The Fortran Whetstone programs were the first general purpose benchmarks that set industry standards of computer system performance. Whetstone programs also addressed the question of the efficiency of different programming languages, an important issue not covered by more contemporary

standard benchmarks.

Présentation et histoire. Le langage de programmation Pascal (dont le nom vient du mathématicien français Blaise Pascal) a été inventé par Niklaus Wirth dans les années 1970 avec l'aide d'un de ses étudiants, Urs Amman. Il a été conçu pour servir l'enseignement de la programmation de manière rigoureuse mais simple, en réaction à la complexité d'Algol 68.
