2 NUMERICAL METHODS FOR DIFFERENTIAL EQUATIONS Introduction Differential equations can describe nearly all systems undergoing change. They are ubiquitous in science and engineering as well as economics, social science, biology, business, health care, etc.

Analytical chemistry studies and uses instruments and methods used to separate, identify, and quantify matter. In practice, separation, identification or quantification may constitute the entire analysis or be combined with another method.

Slope stability analysis is performed to assess the safe design of a human-made or natural slopes (e.g. embankments, road cuts, open-pit mining, excavations, landfills etc.) and the equilibrium conditions. Slope stability is the resistance of inclined surface to failure by sliding or collapsing. The main objectives of slope stability analysis are finding endangered areas, investigation of ...

The most common way of computing numerical derivative of a function at any point is to approximate by some polynomial in the neighborhood of . It is expected that if selected neighborhood of is sufficiently small then approximates near well and we can assume that .. Let's consider this approach in details (or go directly to the table of formulas).. At first, we sample at the (is odd ...

Abstract. The atmosphere is a carrier on which some natural and anthropogenic organic and inorganic chemicals are transported, and the wet and dry deposition events are the most important processes that remove those chemicals, depositing it on soil and water.

Hi Pavel. Nice work. I'm using it now to compute the velocity of a robot (MBARS) and your methods give very good results. I'd like to know if you have the formula of a one-sided version, as using a centered

version forces me to introduce a time lag.

1. Introduction. The expansion of territories by the Ottoman Empire resulted in the development of the Ottoman architecture. The Ottomans constructed several public buildings and edifices in various sizes and forms because of the growing needs of the changing Ottoman community (i.e., from an immigrant tribe to an empire).
