PERFORMANCE PIPE DRISCOPEX 6400 Pipe SERIES

A compressor is a mechanical device that increases the pressure of a gas by reducing its volume. An air compressor is a specific type of gas compressor. Compressors are similar to pumps: both increase the pressure on a fluid and both can transport the fluid through a pipe. As gases are compressible, the compressor also reduces the volume of a gas. Liquids are relatively incompressible; while ...

A pre-entry assessment of every confined space job is imperative to ensure worker health and safety. This assessment must include atmospheric monitoring and a visual inspection of the area around the entry point.

Confined Space Entry Policy Â» Environmental Health

A rack railway (also rack-and-pinion railway, cog railway, or cogwheel railway) is a steep grade railway with a toothed rack rail, usually between the running rails. The trains are fitted with one or more cog wheels or pinions that mesh with this rack rail. This allows the trains to operate on steep grades above around 7 to 10%, which is the maximum for friction-based rail.
