This disambiguation page lists articles associated with the title Vent. If an internal link led you here, you may wish to change the link to point directly to the intended article.

### **Vent - Wikipedia**

A hydrothermal vent is a fissure on the seafloor from which geothermally heated water issues. Hydrothermal vents are commonly found near volcanically active places, areas where tectonic plates are moving apart at spreading centers, ocean basins, and hotspots. Hydrothermal vents exist because the earth is both geologically active and has large amounts of water on its surface and within its crust.

Les vents sont souvent classifiés selon leur force et la direction d'où ils soufflent. Il existe plusieurs échelles de classification des vents dont les plus connues sont l'échelle de Beaufort et l'échelle de Fujita. La première classe la force des vents selon treize niveaux qui vont du calme à celui des vents de force d'ouragan, en passant par la brise, le coup de vent et la tempête.
