A megatsunami is a very large wave created by a large, sudden displacement of material into a body of water.. Megatsunamis have quite different features from other, more usual types of tsunamis. Most tsunamis are caused by underwater tectonic activity (movement of the earth's plates) and therefore occur along plate boundaries and as a result of earthquake and rise or fall in the sea floor ...

I survived a household of religious violence by looking it in the eye. I named the demon for what it was, and that didn't banish it, but at least it brought the beast into the light. I've turned my back on its ways, but that doesn't mean I've left it behind for good. Its heat and hurt will probably always be with me.
