

### **writing java applets pdf**

A Java applet was a small application that is written in the Java programming language, or another programming language that compiles to Java bytecode, and delivered to users in the form of Java bytecode. The user launched the Java applet from a web page, and the applet was then executed within a Java virtual machine (JVM) in a process separate from the web browser itself.

### **Java Programming Examples - Tutorials Point**

Java is a general-purpose computer-programming language that is concurrent, class-based, object-oriented, and specifically designed to have as few implementation dependencies as possible. It is intended to let application developers "write once, run anywhere" (WORA), meaning that compiled Java code can run on all platforms that support Java without the need for recompilation.

## **Java (programming language) - Wikipedia**

In informatica, le applet Java sono programmi scritti in linguaggio Java che possono essere eseguiti da un web browser (elaborazione lato client). Le applet appaiono visivamente collocate all'interno di pagine Web, e sono solitamente usate per creare pagine dotate di funzioni interattive con l'utente non realizzabili con altre tecnologie per il Web statico, appartenendo dunque al paradigma del ...
