Chrome OS is an operating system designed by Google that is based on the Linux kernel and uses the Google Chrome web browser as its principal user interface. As a result, Chrome OS primarily supports web applications.. Google announced the project in July 2009, conceiving it as an operating system in which both applications and user data reside in the cloud: hence Chrome OS primarily runs web ...

The Docker project was responsible for popularizing container development in Linux systems. The original project defined a command and service (both named docker) and a format in which containers are structured. This chapter provides a hands-on approach to using the docker command and service to begin working with containers in Red Hat Enterprise Linux 7 and RHEL Atomic Host by getting and ...

The Active Object is the prime object in Multimedia Fusion. Probably all applications made in MMF2 have at

least one active object. In the earlier klik products the Active Object was the only object that you could draw graphics for, assign movements to, give alterable values to and in general do fun stuff with at runtime.
